Research Interests

Computer vision, representation learning, generative models, image-video generation, explainability

Education

07/2024 – Present	Doctor of Philosophy in Computer Science <i>Supervisors: Prof. Dr. Bernt Schiele, Dr. Jonas Fischer</i>	Universität des Saarlandes 
10/2020 – 08/2023	M.S. in Electrical and Electronics Engineering <i>Specialization Area: Signal Processing CGPA: 4.00 / 4.00</i> Thesis  : Interpreting Convolutional Blocks as Feature Embedding by Template Matching for Image Recognition <i>Supervisor: Prof. Dr. A. Aydın Alatan</i>	Middle East Technical Uni. EEE 
10/2015 – 07/2020	B.S. in Electrical and Electronics Engineering <i>Specialization Area: Signal Processing and Biomedical Engineering</i> <i>CGPA: 3.71 / 4.00 Graduated as a High Honor Student</i>	Middle East Technical Uni. EEE 

Work Experience

01/2024 – Present	PhD Student Researching on representation learning and the explainability of deep networks in the context of computer vision.	Max-Planck-Institute for Informatics 
10/2026 – 03/2027	Applied Scientist Intern	Amazon Vulcan Pick Team
09/2020 – 12/2023	Researcher -Designing and testing face detection algorithms using Python . -Designed an enhanced SSA simulator for generating realistic space images using Python . -Designed frameworks for detecting and segmenting ships, detecting resident space objects (RSOs) from high-resolution optical images using Python and MATLAB .	METU Center for Image Analysis 
10/2018 – 09/2020	Undergraduate Student Researcher Developed an algorithm for semantic segmentation by uniting the concepts of fully-connected networks and convolutional neural networks with super-pixels using Python .	METU Center for Image Analysis 
07/2019 – 09/2019	Intern Developed an algorithm for radar target classification on micro-doppler signatures of drones and birds using  LSTM in MATLAB .	ASELSAN, Turkey 
06/2018 – 08/2018	Intern Developed a foundation on deep learning and implemented semantic segmentation using  U-NET in Python .	Mobilus-Invidyo, Turkey 

Publications

09/2025	Temporal Concept Dynamics in Diffusion Models via Prompt-Conditioned Interventions Paper  Author(s): Ada Görgün , Fawaz Sammani, Nikos Deligiannis, Bernt Schiele, and Jonas Fischer Accepted as a conference paper at the International Conference on Learning Representations, (ICLR 2026)
---------	---

07/2025	VITAL: More Understandable Feature Visualization through Distribution Alignment and Relevant Information Flow Author(s): Ada Görgün , Bernt Schiele, and Jonas Fischer Accepted as a conference paper at the International Conference on Computer Vision, (ICCV 2025)	Paper 
08/2023	Knowledge Distillation Layer that Lets the Student Decide Author(s): Ada Görgün , Yeti Ziya Gürbüz, and A. Aydın Alatan Accepted as a conference paper at the British Machine Vision Conference 2023 (BMVC 2023)	Paper 
10/2022	Feature Embedding by Template Matching as a ResNet Block Author(s): Ada Görgün , Yeti Ziya Gürbüz, and A. Aydın Alatan Accepted as a conference paper at the British Machine Vision Conference 2022 (BMVC 2022)	Paper 

Relevant Projects

Pattern Recognition: Compared two methods for ship detection from satellite images, one using  deep-learning, another one using  graph-cut.

Machine Vision: Compared two methods for semantic segmentation, one using super-pixels joined with deep learning, another one using  GrabCut.

Adaptive Signal Processing: Focused on optimum filtering theory and implemented various adaptive filters including LMS, ϵ -NLMS, APA, RLS, Leaky LMS, Signed-error LMS for comparison using **MATLAB**. Implemented a mouse tracker with Kalman Filter using **C** and **LabVIEW**.

Optimization: Implemented various optimization algorithms including Gradient Descent Method, Newton Method, Davidon-Fletcher-Powell method, line search algorithms and a project using the enhanced version of the Salp Swarm Algorithm (Available on  Github)

Honors and Awards

2020	Bülent Kerim Altay Award <i>An award given to students who has 4.0 GPA.</i>	<i>Bülent Kerim Altay Awards Website</i> 
2016 – 2020	High Honor Student <i>Semester high honor student 6 times. A title given to students with a GPA greater than 3.5.</i>	<i>METU Rules and Regulations Article-28</i> 

Certificates & Other Skills

Certificates: IELTS Academic 8 / 9

Simulation & Design: LT Spice, Quartus II, Verilog, LabVIEW, Keil μ Vision

Utilities: $\LaTeX$ (Experienced), GitHub (Experienced), Microsoft Office applications (Experienced), Ubuntu (Experienced)

Languages

Natural: Turkish (Native Speaker), English (Advanced)

Programming: Python, MATLAB, C++, C

Machine Learning Libraries: PyTorch, TensorFlow, Hugging Face, Scikit-Learn

Computer Vision Libraries: OpenCV, PIL

Hobbies & Other Interests

Playing Piano, Playing Chess, Playing Tennis, Swimming
